New Phonebook main view

To make flight preparations quick and easy you can use this section and add contact data to Leon.

Hover the mouse over  icon and select 'New Phonebook'.

Filtering options are located at the top of the 'New Phonebook' view.

The **list of contacts** displays the following information:

- **Name** - name of contact
- **Code** - code of contact
- **Email** - email, to which all the emails are sent
- **Phone** - work phone number
- **Type** - type of contact:

-  - indicates person

-  - indicates company

- **Client** - indicates whether the contact is or isn't a Client. This can be indicated by selecting the 'Client' checkbox in contact profile
- **Country** - a country where the contact is based

Filters

The filtering options are located at the top of the page.

There are the following **filtering options** available:

-  - allows filtering by contact name and the contact code
-  - allows displaying all the contacts or the animals only
-  - allows importing PAX data from Excel

EXPORT TO EXCEL

- - allows exporting Phonebook data to Excel

Resetting the filters can be done by deleting already selected options.

New Contact

The 'New contact' form has two tabs: 'Company' (selected) and 'Person'. The 'Company' tab contains the following fields: Name (with a dropdown for 'Company name'), Address (with a dropdown for 'Address'), Phone (with a dropdown for 'Phone'), Email (with a dropdown for 'Email'), and a 'Notes' section. There are also filters for 'Country', 'Language', 'Salutation', 'Operator base', and 'Labels'. A 'CANCEL' button and a green 'SAVE' button are at the bottom right.

Adding new Company

The 'New contact' form has two tabs: 'Company' and 'Person' (selected). The 'Person' tab contains the following fields: Name (with a dropdown for 'Name'), Address (with a dropdown for 'Address'), Phone (with a dropdown for 'Phone'), Email (with a dropdown for 'Email'), and a 'Notes' section. There are also filters for 'Country', 'Language', 'Salutation', 'Operator base', and 'Labels'. A 'CANCEL' button and a green 'SAVE' button are at the bottom right.

Adding new Person

In order to add a new contact press **NEW CONTACT** button.

A pop-up window will appear where the type of contact can be selected between:

- **Company**
- **Person**

Depending on the selection, the details are very similar. There are some details that do not apply to the Company' such as Gender, Place of Birth, etc.

Some of the **important fields** are:

- **Language** - an indication of the language that the contact speaks. This could be important when contacting the Client, especially if sales emails and documents are to be sent (can be customized in a specific language in the [Documents Manager](#) and the [EMAIL TEMPLATES](#))
- **Salutation** - salutation selected here can be used in email and documents templates by default
- **Operator base** - more information below

- **Client** - checkbox indicating in the contact is a Client or not
- **Preferred handling agent** - more information below
- **Exclusion zones** - more information below

In order to **edit** the existing contact, simply click on the contact and the editing pop-up window will display.

The contact details in the editing window are the same as in the 'New contact' window.

Operator base

This feature only applies to operators that have more than one base. For the operators with **one base only** this functionality will not apply.

Bases can be defined in [General Settings](#) section.

Once the bases are added, it is possible to assign one to a Client.

A screenshot of a web interface showing a dropdown menu labeled 'Operator base'. The dropdown is open, and the selected option is 'LTN'. There are small icons for search and refresh on the right side of the dropdown.

If the base is **assigned to a Client**, the trip requested by this particular Client will automatically be assigned to the Client's base.

It is also possible to assign or change the original base, including the base initially assigned to a Client, **without having to assign a specific user**.

If you select a particular base in the operator selection dropdown (top-right corner of Leon), the Requests/Quotes list will only display the requests assigned to this particular base.

Handling Requests per Client

It is possible to assign a **default handling agent to a Client** in Leon.

In order to assign a Handling Agent to a Client, you need to select the Agent(s) in the '**Preferred handling agent**' box.

Handling agent can be searched by using:

- Airport ICAO/IATA/Custom code
- Handler Name
- Combination of 'Airport code - Handler name'

It is possible to assign multiple Handling Agents at different Airports to one Client.

Once the Handler is assigned, it will appear as a tag below the 'Preferred handling agent' selection box:

Preferred handling agent

LTN - HARRODS AVIATION

WAW - EXCEL HANDLING SP. Z O.O.

Only one Handler per airport can be assigned to a Client. Assigning second Handling Agent will replace already assigned Handler.

Once the Handler is assigned, it will auto-populate in the OPS checklist when the trip is booked.

Handler assigned to the Client has **higher priority** than the Handling Agent selected as **preferred in the Airport Directory**. This means that the Handler assigned to the Client will overwrite the preferred Handler from 'AD' upon booking the trip from Sales.

Exclusion zones

Exclusion zones are the countries over which the aircraft should not be flying.

The exclusion zones can be indicated in the **Client profile** - 'Exclusion zones' box as per below. Simply start to insert the country name and select it from the dropdown list.

Exclusion zones

Belarus

Ukraine

Once the exclusion zones are selected, the **flight time calculations in the 'Requests/Quotes' section** ('Calculate Flight Time' option) will take these zones into consideration.
