In SCHEDULE you can add a new trip regardless section you work in: TABLE, CALENDAR or TIMELINE.

Adding a new trip in section SCHEDULE

Click button **NEW TRIP** to add 1 or more legs. Select an aircraft, flight number (Leon assign it automatically if it has been defined in fleet edition screen), date, STD, ADEP/ADES, STA. You can also add PAX number or leave trip as ferry.

Buttons **UTC** & **LT** allow to switch between times while adding a new trip.

Leon suggests STA if a particular aircraft speed details are added in fleet edition section, using GCD and/or average winds. STA suggestion can also be based on 5 minimum same historical routes.

To add more legs to the trip click **+** and to delete a leg click

You can also add a new **positioning** or a new **office** duty by clicking appropriate buttons placed next to NEW TRIP one.
