

Aircraft Reservation

Invalid Link

Aircraft reservations (confirmed and optional)

Leon allows you to **reserve** aircraft at particular airport within defined period of time. There is also a possibility to assign reservation to a client. Once the aircraft has been reserved, the system temporarily excludes this plane from any regular flight planning.

To add a reservation click on a selected day, right next to the date. The new window will come-up and mandatory fields like: aircraft type, registration, airport, date & time - all these fields need to be filled in. You can also add the name of the reservation, client, type of reservation and notes.

There are **7** types of reservations:

- **Reservation**
- **No crew**
- **Reservation option**
- **No charter**
- **Owner's approval**
- **Crew on request**
- **36 hrs crewrest**
