

Diets Definitions

In this section you input all the necessary details (amounts, currency, mode) so that the panel works properly and the wages match performed flights by your crew members.

There are **2** modes available:

- **Normal**
- **Workflow**

Normal mode

Airport	Month	Currency	Currency day rate	Currency/PLN rate
Default	Default	EUR	40	1
LTN	Default	EUR	50	1
VKO	Default	EUR	80	1

Show diems for home bases countries ☐

Default per diems currency: EUR

Diets definitions used in crew

Mode: ☒ normal ☐ workflow

Save

Per Diems - mode 'Normal'

In this mode you can see columns such as:

- **Airport** - if the day rate is the same for all airports, it should remain set as 'Default'. That means, all flights away from home base will be calculated at the same rate. If there are exceptions, you should add the airport code and define the rest of columns accordingly.
- **Month** - you can select for what month per diems should be counted - for a specific airport.
- **Currency** - choose the currency in which per diems should be counted.
- **Currency day rate** - the amount of money for a single per diem - it can differ for different airports.
- **Currency/... rate** - you can define default per diems currency in Admin > Operator Settings > General

IMPORTANT!

The column '**Currency/... rate**' should be set as '**1**' if airport currency should be counted vs default currency on a **one-for-one** basis. However, if you have defined a different currency for some airports and you want the system to convert it to default currency - the column '**Currency/... rate**' should be set as '**0**'.

Example:

Default currency is set as **EUR**. There are **2** airports for which per diems should be calculated in a different currency: **STN** - currency **GBP**, **SSH** - currency **USD**. When the column 'Currency/EUR rate' for these 2 airport is set as '**0**' - both currencies will be converted to **EUR**, which will be displayed in

the Per Diems report.

All rates are converted according to **National Bank of Poland** exchange rates updated every 24 hours - go to section Sales > Currency Exchange Rates to view the rates

Workflow mode

Diets definitions used in reports and crew

Airport	Month	Currency	Currency day rate	Currency/PUL rate	
Default	Default	EUR	40	1	
LTH	Default	EUR	50	1	
VKO	Default	EUR	60	1

Per Diems - mode 'Workflow'

In this mode you can define the **workflow** of calculating, checking and approving per diems. You can select people who will be responsible for approving it as well as person who can do payments. Pilots can also check their per diems and either approve them or reject.

For the exact mechanism of how the diets are calculated in Workflow mode go to [Per Diems](#) section of this manual.
