# Editing trip

Editing trip - the view on the bottom panel

If you click **EDIT TRIP** button at the bottom of the screen an additional panel will show up. If the selected activity is a flight, the whole trip (series of flights) will open in the bottom window with the selected leg in shaded green. You can edit each column (Flight No., Date, STD/STA or PAX) and modify it.

You can also add a new leg in this section by clicking **+** or delete a leg by clicking

While you are editing a trip in the bottom panel, you can still use the right properties panel to access given sector details and modify them.
