From: 19-07-2015 Days: 2

Show Send flights to PPS

## Export to PPS screen

In order to use this facility you have to request integration with **PPS**. The integration process with PPS is explained [here](#)

Once integration is set up, you can start exporting schedules either:

- **Manually** - by using "Send flights to PPS" button (checkbox unticked). Here you can also choose the schedule time-frame.
- **Automatically** - checkbox ticked, schedules sent every 5 minutes.

**Leon will check and export the flights for 300h in advance.**

Please make sure there are no discrepancies between Leon and PPS regarding aircraft registration - it has to be the same in both softwares.
