

Export to PPS

The PPS Flight Planning system that gives a dynamic data feed of schedule changes, aircraft changes, load data etc.

Integration between PPS and Leon comes down to feeding schedules as well as some basic data (cargo) from Leon to PPS. The advantage of being integrated is that your flights will be available to brokers worldwide.

Export data to PPS every 15 minutes.

Flight No.	Date	STD	ADCS	ADCP	STA	Reg No.
105	19-07-2015	16:50	HTDA	HTKJ	17:55	
205A	19-07-2015	18:15	FLKK	PHNA	19:28	
148	19-07-2015	18:25	HTMR	HTDA	20:08	
156	19-07-2015	18:30	HTKJ	HTDA	19:35	
205B	19-07-2015	20:00	PHNA	HTDA	22:28	
141	20-07-2015	03:30	HTDA	HTMR	04:38	
121	20-07-2015	04:30	HTDA	HTGW	05:25	
101	20-07-2015	04:35	HTDA	HTKJ	05:18	
142	20-07-2015	05:35	HTMR	HTDA	06:48

Send flights to PPS

Export to PPS screen

In order to use this facility you have to request integration with **PPS**.

For the integration with **PPS** contact support@airsupport.dk to get a login & password. Once you've got it, you need to email that login & password to support@leonsoftware.com so that the integration is fully set up on both sides.

Once integration is finished, you can start exporting schedules either:

- **Manually** - by using "Send flights to PPS" button (checkbox unticked). Here you can also choose the schedule time-frame.
- **Automatically** - checkbox ticked, schedules sent every 15 minutes.

Please make sure that there are no discrepancies between Leon and PPS regarding aircraft registration.
