

Fuel Prices settings

In this section, it is possible to set up the default fuel settings per Operator.

The 'Fuel' section is divided into two subsections:

- **Fuel Settings**
- **Exclude Fuel Suppliers Imports**

Both subsections are explained below.

Fuel Settings

In this subsection, basic settings for fuel and fuel prices can be set up:

Fuel Settings

Default fuel unit

☐ kg ☒ lbs

Default currency for fuel prices

USD

Default quantity unit for fuel prices

[per GAL]

Default price type for fuel prices

base

'Fuel Settings' subsection

- **Default fuel unit** - option to select kg or lbs. This will be used as a default unit, unless an aircraft has it defined differently in its profile (in [Fleet](#) section). In this case, Leon takes the aircraft fuel & weight units as default (displayed in the Journey Log)
- **Default currency for fuel prices** - default currency used in the [Fuel Prices](#) section as well as the [Fuel](#) tab in the OPS section
- **Default quantity unit for fuel prices** - default unit for fuel prices used in the [Fuel Prices](#) section as well as the [Fuel](#) tab in the OPS section
- **Default price type for fuel prices** - default price type used in the [Fuel](#) tab in the OPS section

Add fuel supplier import to exclude

'Exclude Fuel Suppliers Imports' subsection

In this subsection, it is possible to exclude the Fuel Suppliers from displaying in the [Fuel Prices](#) section.

This will allow displaying the Fuel Suppliers that are actually used in the [Fuel Prices](#) section.

Excluding the Fuel Suppliers is very simple. Click on the **Add fuel supplier import to exclude** button and select the Fuel Supplier in the dropdown. Click on the 'Update' button to save changes.

Once the list of excluded Fuel Suppliers is saved, the selected ones will not appear in the [Fuel Prices](#) section.

As per the below example, the 'Britannium Jet' supplier was excluded. Upon saving, it was removed from the list of available suppliers in the [Fuel Prices](#) section:

Upload fuel prices

You must click Save to store fuel prices after the upload
