Introduction

Welcome to the manual of **Leon** application - online scheduling software for aviation.

Leon is an application allowing to keep track of flights, crew, duties, documents and many other tasks typical for aviation company. General product description is available under company website: www.leonsoftware.com

If you need help while using the application and you cannot find it in this manual, please contact Leon **customer support** by sending email to support@leonsoftware.com

Browsers

Leon is an online application accessible through a web browser. Internet connection is required at all times while working with the application.

List of supported browsers:

- Chrome (recommended)
- Firefox
- Safari
- Opera
- Internet Explorer 8 or later

Chrome is recommended as it is a browser that is mostly being used during the development process. Internet Explorer is supported, but not recommended due to compatibility issues.

Separate application dedicated for iPhone/iPad is also available. Please search **AppStore** using phrase 'Leon Software' and install the application on your device. This application can work offline, which is particularly useful for crew members.
