MX > Fleet Documents

This section shows **all documents** assigned to the whole fleet.

In the filter you can view the list by: aircraft type, aircraft registration, document type, document name. You can also see documents defined as **not required** (for dispatch, if a checkbox 'Req.' is marked when you add a new doc). Empty documents (without any details defined) can be viewed by marking a checkbox **Show empty**.

Click on any document to get redirected to the section where you can add all details.

Especially important is the **expiry date** of documents. If a document has expired, on the page **Fleet Documents** Leon will mark it as the **RED** alert-belt and will place it on the top of the list. If a document is due to expire in less than **30** days, Leon will mark it in **ORANGE** . Documents due to expire within more than **30** days will be marked in BLACK.

There are documents that do not get expired, such as 'Noise Certificate'. You can set the expiry date as 'Never' by inserting: XXX.
