

# My Logbook

The screenshot displays the 'Personal Flights List' report. It features a table with columns for flight details and a sidebar with various filter options. The table includes columns for flight number, date, aircraft type, and other relevant data. The sidebar contains checkboxes for different flight types and filters.

Report 'Personal Flights List' - crew flights & other duties

With this report crew can generate a **list of all flights** they have performed or will perform in a selected period of time. Apart from **flights details**, such as: Date, Acft type, Acft reg, Flight no. - this report also shows useful data such as: Block time, Flight time, Duty time Night time, number of landings, COM surname and FDP time.

In the filter crew can find a **Timezone** option which allows them to switch between UTC, LT, Base Time and Selected Person Base Time.

Below the list of flights crew can find a **summary** table where total block time, CMT and the currency is split per aircraft type and the flown position.

In the filter crew can mark **additional checkboxes**, such as: flights as OBS, positionings, options or particular trip type. It is also possible to export **all crew flights to pdf**.
