17	17000	1700	1700	1700	1700
18	18000	1800	1800	1800	1800
19	19000	1900	1900	1900	1900
20	20000	2000	2000	2000	2000

'Owner Board' settings main view

Owner Board settings allow selecting specific preview access levels to specific items within the [Owner Board](#) view.

These specific access levels are assigned to the **groups of privileges** (left column in the table).

Currently, there are following columns available within the 'Owner Board' settings:

- **PAX Number**
- **Crew**
- **Handling ADEP**
- **Handling ADES**
- **Permits**
- **Slots**

Selecting the checkbox within either column for a group of privileges will affect the relevant details within the flight tile in the 'Owner Board' view.

Clicking/unclicking the checkbox will save the changes to the settings automatically.

Example

Discussion group	SA Number	Case	Reading	Parents	Site
Group 1 (n=10)	10	10	10	10	10
Group 2 (n=10)	10	10	10	10	10

Change of 'Owner Board' settings

As you can see in the below screenshot, some settings were changed for the 'Owner D-LEON' group of privileges, as follow:

- Handling - switched off
- Permits - switched off
- Slots - switched off

The screenshot shows the 'Flight Details' section with two flight segments. The first segment is WAW to BER, and the second segment is WAW to BER. A red arrow points from the first segment to the second segment.

Before and after the change of settings

In the screenshot on the right-hand side, the preview in the 'Owner Board' view was limited to:

- Schedule

- Crew details
- PAX number

Based on the settings, Handling, Permits, and the Slot details were removed from the preview.
