## Introduction

Adding ratings to crew means making them avaiable on the list to choose from when adding a new flight. If you give a rating **CPT** to a pilot, then when you click on CPT field in Edit Flight screen you will be able to select him for that position.

					88.99
Person	1.000	arrist	Puneton .	Arealites	AD18 - Arbus AD19
Assemble Phil	AND			Punction type	* •
		AD19-Attos A319	OPT PO, INS, LTO, TRI, SPL 085, TRE, TVL FIL, IFA, FA085, EFA, FND, IFA2	Person	1 w
Delta Thomas	001			form per page	50 v
		AP19-Arbus Al19	OPT

		ATTE-Arbuit ATTE	CPT, PO, LTC, TRI, IPI, TRE		
Forbol Han	POK				
		AD19-Althou AD19	FAE FAE IFA EFA		

Crew ratings page

In **Crew Ratings** screen you can see all crew members with previously added ratings sorted alphabetically. In the filter you can select aircraft type, function type or a person (to see only his ratings).

In order to assign a crew member to a flight you need to specify what his position is on a particular aircraft type (CPT, FO, FA, etc.). It is <u>very important</u>, because when adding crew to the flight, a crew member without ratings assigned <u>will not appear</u> in the crew suggestion drop-down list in the edit flight screen.

## Adding ratings

Adding ratings to crew

Select the name from the list of crew members or find the person in the filter and click their name (in blue). Select the aircraft type and tick ratings from the list, then click 'Update' in order to save changes.

If you want to add a function that is not on the list, go to Aircraft Crew positions and follow the steps described here.

Once ratings have been added, you can specify if a particular crew member is experienced in the assigned position or not by ticking the box **Experienced**. It is up to the Operator what criteria are applied to mark the crew member as experienced.

Туре	Crew staffing	Rating	Experienced	
	Include 🗸	CPT	<b>~</b>	×
A319 - VC-1 ACJ	See ednorsements	FO		$\mathbf{x}$
		LTC	-	×

Additionally, if the 'Include' checkbox is ticked and the restrictions are inserted in the 'Crew staffing' column the crew will appear in the Crew Staffing Plan report.

Leon will highlight the crew in red in the Flights List section if two inexperienced pilots are assigned on the same flight. When clicking on the highlighted crew you will find a warning:

Both CPT & FO are not experienced on G450. You can change their experience in Crew > Ratings page.

In the **Additional settings** the AOC can be selected (if more than one AOC rules apply to the Operator). Additionally, the User AOC history can be edited upon clicking on the **Details** button:

AOC history					
AOC	Expire	J			
PSN 🗸	02-02-2022	×			
As operator	XXX	×			
Send					

## **Notifications about Crew experience**

Notifications about experience					
You can setup condition which must be met in order for a pilot to be considered as experienced. Leon will send the notification email but will NOT set the experienced flag automatically.					
Send notification emails	8				
E-ral"	text@openations.com				
Minimum hours flevin" And	108				
Minimum landings*	10				
Save					

Experience notifications

In this section you can setup conditions which must be met in order for a pilot to be considered as **experienced**.

Go to a section Settings > Ratings and click **Notifications about experience** link. A pop up window will open where minimum **landings** and **hours** flown need to be entered.

You can insert more than one e-mail address separated by a comma to which the notification will get sent. Once the specified minimum has been reached Leon will send the notification email but **will NOT** set the experienced flag automatically in Crew profile, tab Ratings.

Only real flights are taken into consideration for notifications about crew experience, so training flights or
