

Aircraft Flights

[illegible]

Report 'Aircraft Flights' - Fleet flights & fuel usage

Select a period of time for which you want to see all flights performed by entire fleet. It is also possible to view **Flight Order** document for each leg.

The report also shows **used fuel** data (taken from journey logs) along with number of kilograms/pounds (fuel unit selected in the filter) per flight hour and block hour.

You can also use the filter to view **flights which start or end in UE** or flights **only within EU**.

The **summary** table appears in the bottom-right corner of the screen.
