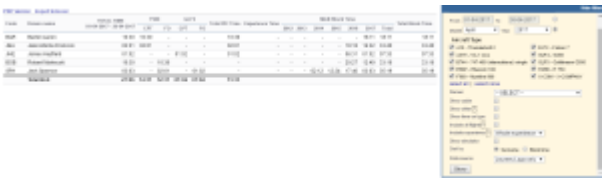
Crew Block Time



Report 'Crew block time' - including previous operators flying hours done by pilots

Crew block time is displayed for cockpit crew (cabin crew can be included if marked in the filter) and it appears per aircraft and per functions.

The report also shows **Experience time** - pilot's experience before joining a current operator, which can be input in the user's profile (as long as it has been enabled in section Admin > Operator Settings).

You can select **data source** in the filter to get appropriate data. It is also possible to export data to PDF and/or Excel file.
