Crew Block Time

Report 'Crew block time' - including previous operators flying hours done by pilots

Crew block time is displayed for cockpit crew (cabin crew can be included if marked in the filter) and it appears per <u>aircraft</u> and per <u>functions</u>.

The report also shows **Experience time** - pilot's experience before joining a current operator, which can be input in the user's profile (as long as it has been enabled in section Settings > General Settings).

You can select in the filter options such as: Person, show cabin & other positions (i.e. FM), show time on acft type, include the whole experience and all flights, show SIM flights and **data source**.

It is also possible to export data to PDF and/or Excel file.
