

The screenshot shows a web application interface for a 'Crew Currency Report'. On the left is a table with columns for 'Aircraft', 'Person', 'Currency', 'Valid From', 'Valid To', and 'Status'. The table contains several rows of data, with the 'Status' column using color coding: red for expired, orange for 30 days or less left, and green for valid. On the right is a 'Filter' dialog box with a 'Person' dropdown menu and a 'Filter' button.

## Crew currency report

This report gives an overview of crew currency and helps to manage validity of currency for each pilot.

It provides information such as:

- **Aircraft type** that the currency applies to.
- **Dates of landings** in three columns.
- **Date of expiry** of currency including colour coding.

The colours suggest number of days before the currency expires:

- **Red** - Currency expired
- **Orange** - 30 days or less left to on vailidity
- **Green** - Currency is valid

It is possible to filter by:

- **Aircraft Type**
- **Person**
