

FTL Violations

The screenshot shows a software interface for reporting FTL violations. It features a table with multiple columns, likely representing flight details and violation metrics. Several cells in the table are highlighted in red, indicating specific violations. A sidebar on the right contains various filters and controls for the report.

Report 'FTL Violations' - all FTL exceedances are indicated in red

This report shows all FDP, duty or rest violations along with cumulative times violations in a selected period of time in the filter. It is divided into 2 parts exactly like report FTL Sheet.

All violations displayed in this report are also highlighted in red in the Flights List section (crew codes are in red).

You can export this report data to PDF or Excel format.
