

## HIL Flights

[illegible]

## Report 'HIL Flights' - generated list of fleet defects recorded in Leon

In Leon you can register and archive all fleet defects in section MX > [Hold Items List](#) .

The report **HIL Flights** shows all items in a selected period of time in the filter. You can export data to PDF file (click a link in top-left corner of the screen).

The screen shows:

- The aircraft registration number
- HIL item number
- MEL item number
- The description (of the defect)
- The number of flights added within the HIL period of time
