Report 'Per Diems' - crew wages calculated according to settings in section 'Diets Definition' and operator personal requirements

If you have defined **per diems** for your crew in section Settings > Per Diems Definitions (read more about this topic [HERE](#), you can use this report to view monthly wages for crew members.

In the default Leon setting Per Diems are calculated as follow:

- **0.25 per diem** for 1-6 hours outside home base
- **0.5 per diem** for 6-12 hours outside home base
- **1 per diem** for 12 hours and more outside home base

Per diems will be calculated for both - flights with journey log and also without journey log (schedule times apply).

It is possible to switch between **UTC** and **LT** in the filter.

Per diems are calculated for a single day and Leon splits per diem if it crosses midnight. So if duty is from 1700 to 0300 (next day) - Leon will calculate 0.75 per diem as summary of 0.5 per diem from 1700 to 23:59 and 0.25 from 00:00 to 03:00
