Report 'Personal Flights List' - crew flights & other duties

With this report you can generate a **list of all flights** performed by a particular crew member in a selected period of time. Apart from **flights details**, such as: date, acft, flight no., flight times - this report also shows useful data: night time, number of landings, CMT (commercial time), COM surname and FDP time.

Below the list of flights you can find a **summary** table where total block time, CMT and the currency is split per aircraft type and the flown position.

In the filter you can mark **additional checkboxes**, such as: flights as observer, positionings, options or particular trip type. It is also possible to export **all crew flights to pdf**.
