Report 'Personal Flights List' - crew flights & other duties

With this report you can generate a **list of all flights** performed by a particular crew member in a selected period of time. Apart from **flights details**, such as: <u>date</u>, <u>acft</u>, <u>flight no.</u>, <u>flight times</u> - this report also shows useful data: <u>night time</u>, <u>number of landings</u>, <u>CMT</u> (<u>commercial time</u>), <u>COM surname</u> <u>and FDP time</u>.

Below the list of flights you can find a **summary** table where total block time, CMT and the currency is split per aircraft type and the flown position.

In the filter you can mark **additional checkboxes**, such as: flights as observer, positionings, options or particular trip type. It is also possible to export **all crew flights to pdf**.
