

This report allows to monitor a number of rostered duty changes which can be a contributory factor to crew fatigue.

In the filter you can select a period of time 'From' - 'To' or select a month. You can also define **Publish date** - by setting it you can check the number of changes made in the roster from that particular date **14** days ahead.

This report is not available yet - will be released with 3.33 publication (middle of April).
