Report 'Route Statistics' - annual set of flights

To enable this report you need to insert **ADEP** & **ADES** airports codes in the filter.

On the screen Leon shows annual set of flights (divided into months) per an aircraft type.

In the column **Total** you can find summary data for flight time, block time, fuel used as well as the date of the first and the last flight along with the total number of flights. In the brackets Leon shows variation.
