Total	PIC	30.88	00:17	1	Per diem			50 (E6)	50
					Total				1396.43

Report 'Salary by Aircraft' - commercial time done by a particular crew member

This report is similar to 'Block Time by Function' - it shows salary calculated by the **CMT** (Commercial Time) inserted to **Journey Logs**, but per an individual crew member selected in the filter.

If your Journey Log does not have a field CMT, you can add it in Admin > Operator Settings > Flight Editing screen (mark the checkbox and save).

On the report you can see **2** tables:

1. Shows: aircraft registration, position flown on the aircraft, OFP time (CMT time from Journey Log), Gain time (CMTminus (ATA minus ATD)), number of per diems (start at homebase, end at homebase).
2. OFP & Gain times along with the total salary.
