

Technical Logbook

Date	Stop	Acc	Time	Landings	TBM	Cycles
2016/08/01	00:00	12:30	03:05	1	001:00	11
2016/08/01	15:30	18:42	02:40	1	000:01	14
Total				2		

Report 'Technical Logbook' - aircraft total hours & cycles

In Leon there are **2 ways** of adding aircraft hours & cycles to Leon:

1. **Fleet CAM** - enabling the panel where you can insert TAH & TAC to each aircraft and engine (read more [here](#))
2. **TLB** - adding aircraft total time & cycles (check for details [here](#))

If you select the 2nd option, you can generate a report with all details from TLB and export it to Excel.
