

Before you can start using Leon on your Android, you need to install it from Google Play. Search for Leon Android application logo 

Once your application has been downloaded, click on the icon and open the application the **log in** screen will appear.

Click on the particular day on the screen to view **duty details**. If you have been assigned to a new flight in Leon, you will see an aircraft icon in the bottom-left corner. If a duty was added from Crew Duties table, then a symbol of the duty-type will be visible in the bottom-right corner (see the screenshot below).

- **Flight duty**

The meaning of markings on each calendar day are as follows:

**1 - day number**

**2 - duty symbol/colour** - duty colour represents the one defined in CDR Definition section.

**3 - aircraft symbol** - appears if the logged-in user is scheduled as a crew member for any flight on

that day, according to the filter settings.

**4 - colour of the strip** - reflects the kind of **fleet activity** on that day - it's top priority information. If there is any single **confirmed flight** for selected fleet, the strip will be **light yellow**. If there are **no confirmed flights** but at least one **option** for a flight, the strip will be **light green**. The same logic applies to the following colours: maintenance not confirmed (light red), confirmed (red), aircraft reserved by sales (orange), aircraft blocked as no crew available (purple). All the colours are exactly the same as in Leon 'Planned Flights' view.

The **current day** on the screen has a **dark-grey** background and the day-number is in white:

The **currently displayed** day has a **blue** background:

When a particular duty has been assigned in Crew Duties table, only the duty symbol is displayed (e.g. O, S, T).

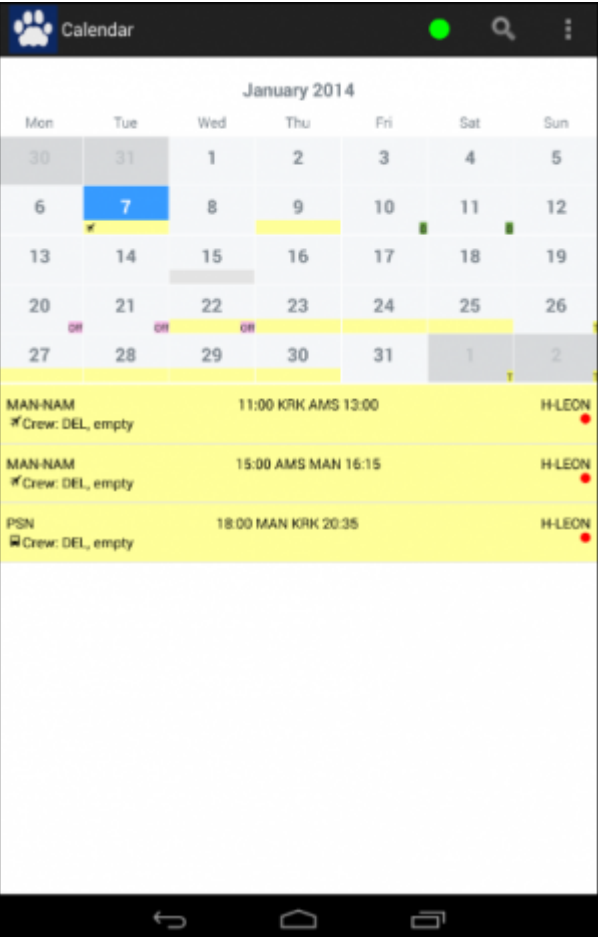

Right below the calendar, when clicking on a particular day, you can see details as follows:

- flight number
- schedule times
- destination airport & arrival airport codes
- aircraft registration
- crew codes
- number of passengers

Flights performed more than **6** weeks from the present day are **not available** in the mobile application

When editing '**Legs Info**' belt (if you have been given privileges to display it), the application displaies exactly the same information as it was previously inserted to Leon by your OPS dept.

Crew	
Weather	ACK
Crew transport	ACK
Fuel	
Fuel Amount: 800 lbs	RQS
Handling	
WAW (LOT RAMP SVCS) STD 09:00	RQS >
MAN (AIRBASE FLT SUPPORT) STA 12:00	RQS >
Ops	
FPL	ACK

You can also view **notes** inserted into a particular 'Legs Info' section, i.e. 'Catering'.

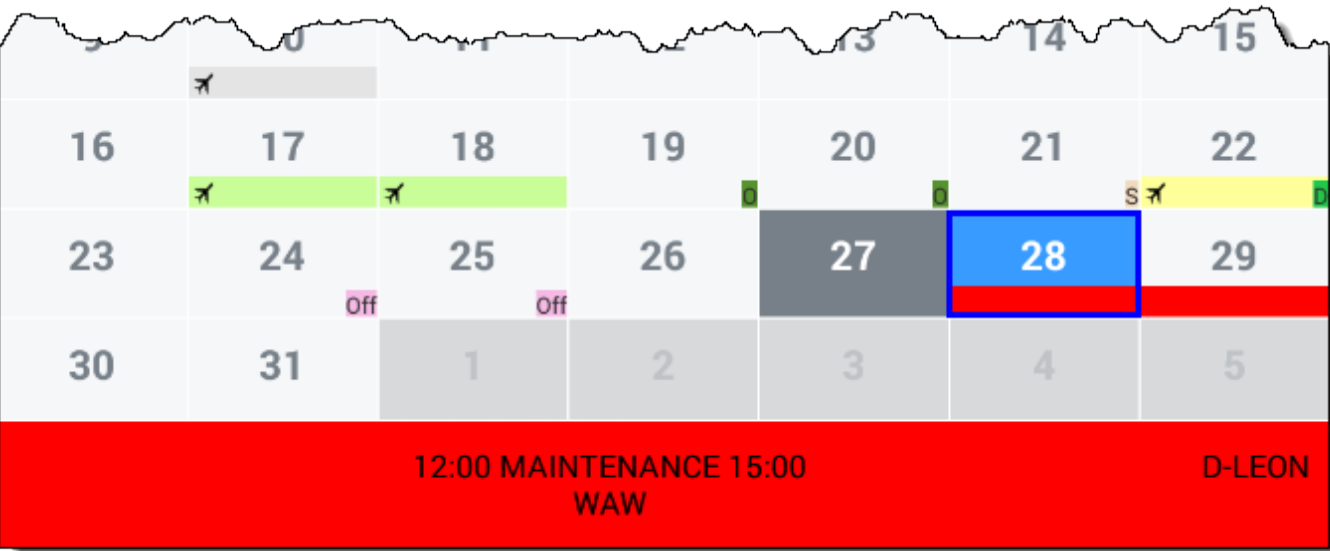

Fresh fruits & vegetables  
Water, juice & wine  
Sandwiches & pizza

Or check passengers details, when they have been added to '**Legs Info > Pax**' section.

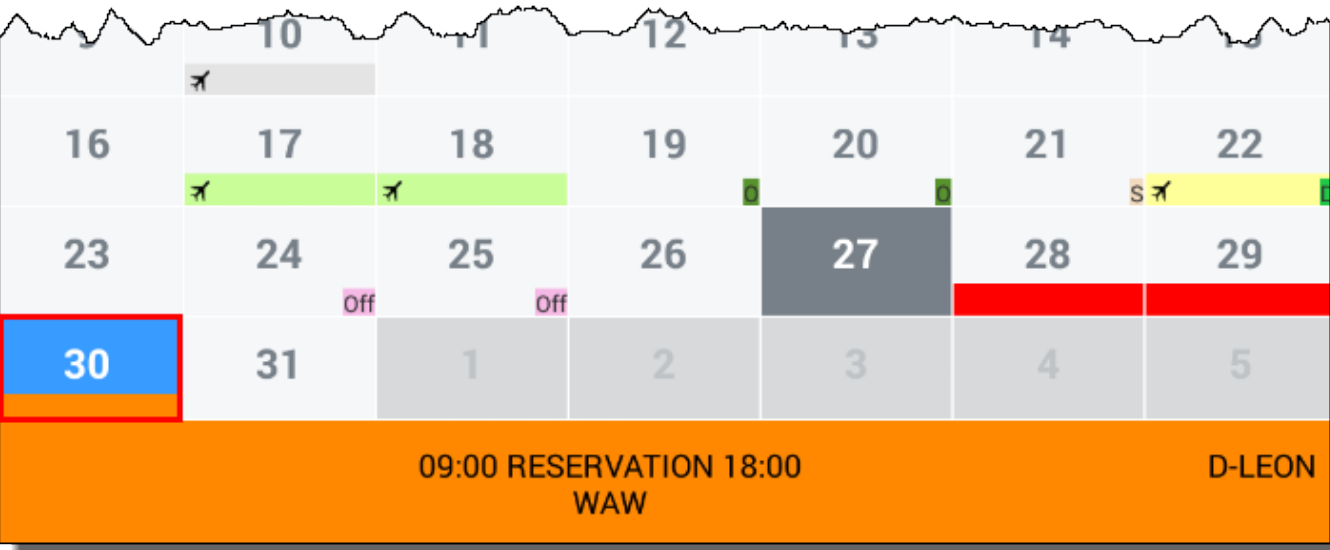

1. Christian Alfa  
DoB: 08-12-1974  
Passport: GB345678, expires: 02-07-2013

2. Alex Sierra  
Passport: GB987654, expires: 22-09-2016

**Scheduled maintenance** is being displayed with a red belt. Below the calendar there will be information about the **time & date, airport and aircraft registration**. When clicking on it, you can see a **description** of the scheduled maintenance added previously in Maintenance > Scheduled Maintenance > Edit Scheduled Maintenance section. **Maintenance option** will appear in pink - the same way it does in 'Planned Flights' section.

**Aircraft reservation** previously added in Planned Flights screen (when clicking on the  icon) appears with an orange belt. When editing it, the information added in the field 'Notes' shows up on the screen.

When clicking the icon  the application shows a new screen, where you can decide what fleet should be visible on the screen - **flights on unticked aircraft will not get displayed**. Also, you can select the option '**Show only my flights**' - only flights you've been assigned to will appear on the screen.
