

If you are a **Flight Support Company** which deals with aircraft chartering, aviation services, consulting, etc... and you want changes in **Airport Directory** sections: **Brief/Training** or **Category** to be applied also to operators using your 'Airport Directory', you can simply mark a checkbox **Apply changes to all operators using (name of your operator) Airport Directory**.

In other words - if you change i.e. **Airport Category** in you Airport Directory for airport LTN from **A** to **B** and that checkbox is marked - all operators you deal with will see this change.

The same apply to **Airports Briefs**, **Online Trainings** and **Trainings** - changes can be defined per operator.
