

Mirai payment system integration

Integration with MIRAI in Leon

Payment system **MiraiPay** is a part of one-click private jet booking service 'Mirai Flights' focused on instant pricing to the clients. With the help of the MiraiPay service, you can provide your customers with the opportunity to pay for charter flights with several cryptocurrencies.

How to integrate

In order to integrate with MiraiPay you need to fill up the "Configuration" or contact the Mirai Flights support at sales@mirai.flights and request **API Token** details. Once you have it, switch the status to ON, insert provided integration details and save changes. Once saved, you can start the transaction operations in cryptocurrencies.

How it works

1. Set a payment link in the 'SALES' module. On the quote's edition page, click the button **INVOICE** and switch to **BTC**.

A screenshot of the quote edition page in the Leon software. It shows two radio buttons for payment method: 'INVOICE' (unselected) and 'BTC (MIRAI)' (selected). Below this, there is a 'Quote' label and a checked checkbox next to 'B-ARTI'.

Then click the blue button to create the order & payment in 'MIRAI'.

A screenshot of a form element. It includes a label 'Requester email:' followed by a text input field containing 'tdelta.leon@gmail.com'. Below the input field is a prominent blue button with the text 'CREATE ORDER & PAYMENT IN MIRAI' in white capital letters.

2. Customers pay the orders in **Bitcoin** cryptocurrency.
3. The settlement airline company payments are made in EUR.
4. The transaction amount could be up to 300,000 EUR - lack of chargebacks.
