

BOOKINGS changes

We have rearranged a panel **BOOKINGS** to make it more user-friendly for a Customer Support Department dealing with customers once the quote has been booked. Such a team deals with things like:

1. contacting the client to arrange catering, PAX transport, etc...
2. sending a Flight Brief and other documents to the client.
3. adding PAX details to the system.

Grouping quotations & flights by Client

Grouping by Client

Leon shows Quotations & Flights grouped by the **Client** (selected as a 'Requester' in the quote's edition) - this way it is much easier to find a client and deal with the quote.

Leon will show clients assigned to the quote within **selected period of time** and will display them alphabetically.

Subcharter quotes no longer show as a separate tail - they will show on the client's Quotation section.

Adding **Reservations** is no longer possible from this panel - they can be added only from 'OPS > Calendar' or 'OPS > Timeline' sections.
