

# CHARTS

Revenue per an aircraft - chart 'Doughnut'

Revenue per the client - chart 'Bar'

Revenue per the client - chart 'Line'

It is now possible to show various **charts** in sections: **WIZARD REPORT**, **EMAIL TEMPLATES** and **DOCUMENTS MANAGER**.

You can show various charts, by using [QuickChart Documentation](#) web service that generates chart images, which are suitable for embedding in email, SMS, chatbots, and other formats.

The below example made in Wizard Report shows wide range of possibilities of this feature.

## WIZARD REPORT

The screenshot on the right shows how Wizard Report can generate a 'Revenue report' displaying charts **per an aircraft**. The chart is type 'doughnut' but you can as well use 'pie' or 'radar' types. The requirement is, that the report needs to be created in the scope 'Flight'.

You can choose the width & the height of the chart by changing items: width=xxx, height=xxx

You can also create such report **per a client** and it can be displayed as i.e. 'bar' type or 'line' type (see screenshots).
