

Crew auto-rostering by position type

It is now possible to auto-roster crew by the **position type**.

First step is defining position types in a section [Aircraft Crew Positions](#)

In a new column 'Position type' select appropriate position from the list:

CockpitCabinMaintenanceGroundPositioning

Choose currency: USD

Use	Regular Name	Operator Name	Default	Position type
<input checked="" type="checkbox"/>	CPT	CPT	<input checked="" type="checkbox"/>	Captains
<input checked="" type="checkbox"/>	CPT2	CPT2	<input type="checkbox"/>	Captains
<input type="checkbox"/>	CPT3	CPT3	<input type="checkbox"/>	Captains
<input type="checkbox"/>	CPT4	CPT4	<input type="checkbox"/>	Officers
<input type="checkbox"/>	CPT5	CPT5	<input type="checkbox"/>	Inflight service personnel
<input checked="" type="checkbox"/>	LTC	LTC	<input type="checkbox"/>	Flight attendants
<input checked="" type="checkbox"/>	FO	FO	<input checked="" type="checkbox"/>	Senior flight attendants
<input checked="" type="checkbox"/>	SP	SP	<input type="checkbox"/>	Captains
				Officers

Once it's defined, when adding a **duty on the aircraft** (pre-defined in a section [Duties Setup](#) of the Settings panel.) Leon will show the **Function** based on crew **ratings**. So if a pilot has rating CPT, Leon will show by default 'Captains' and if a pilot has rating FO then by default will appear 'Officers'. If a pilot has both ratings CPT & FO, then both positions 'Captains' & 'Officers' will show. The same logic applies to cabin crew.

Captains

It is still possible to select a particular crew position, such as CPT or FO and it will work as before this functionality.

The example below shows how this works if **3** pilots are assigned, when the position type 'Captains' is selected.
