

# DUTY ON THE AIRCRAFT

Before this improvement, assigning duty on the aircraft in 'Crew Calendar' was only possible to be done on 1 tail. Right now it is possible to be done on **multiple tails**.

First step is to define a duty on the aircraft, without selecting a particular tail.

Once it's done, select this duty and Leon will show the duty assignment window, where it will be possible to select more than 1 tail.

Click on the field **Aircraft** and Leon will show a list of tails. First there are tails to which crew has been added as **Preferred crew** (in the aircraft profile, tab Crew) and then all remaining tails for which crew has assigned ratings.

If no flights have been added in OPS section, Leon will assign such a crew member automatically once they are added on the same day as duty on the aircraft (as long as flight's ADEP matches airport of the duty).
