

CREW - improved noticeability of Draft Mode being turned on or off

The toggle switch for changing the mode between “draft” and “live” has been changed. It's now just one button with dynamic label and colour, being changed when it's used and the drafts are turned on or off.

In the picture below you can see the button when the Draft Mode is turned off. You can click it to turn the Draft Mode on.

In the picture below, the Draft Mode is turned on. You can click it to turn the Draft Mode off.
