

CREW PANEL new functionalities

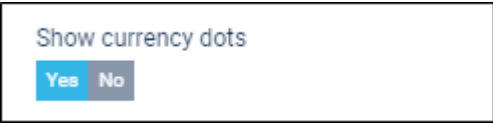

CREW CURRENCY

Crew currency status in Crew Panel

Functionality to show **Crew currency** has been added to Crew Panel.

The feature works exactly like in Crew Duties page. Leon shows the dot next to crew code, which can be defined in a section Settings > [Crew Currency](#) and can be activated in the filter under the three-dot icon in the top right corner of the page.

The colour of the dot shows the current state of the crew currency by displaying the dot either in green, amber or red colour. If you hover the mouse over the dot a tooltip will appear with detailed information about the status of crew currency (see screenshot on the right).

RESERVATIONS

Reservation in Crew Panel

It is now possible to show aircraft **Reservations** in the top section of the Crew Panel. This can be activated by going to the SHOW section under the three-dot icon in the top right corner of the page.

Add duty

We have improved adding duties in Crew Panel - it can be done now in a **quicker way**, than before.

When right-clicking the mouse over the day Leon shows 2 options: 'Add duty' and 'Quick add duty'. By selecting '**Add duty**' Leon will show the list of predefined duties - clicking any duty results in a pop-up window for adding data displayed.
