Default crew positions per tail

It is now possible to set up **default crew positions** not only for aircraft type but also for particular **aircraft tail**.

This can be set up in the aircraft edition panel, under the tab 'CREW'.

In this tab, a list of positions specified in the section 'Aircraft Crew Positions' is visible.

This list can get further **narrowed down** for a particular aircraft registration. This is especially useful for operators with many same-type aircraft in their fleet but different requirements as to the necessary crew positions on each tail.

To apply the default positions, '**Use aircraft type defaults**' checkbox needs to be **unmarked**. If the checkbox is marked, crew positions as specified in Aircraft Crew Positions will apply.
