

# HOTEL BOOKING

When crew finish their duty outside home base, Leon shows that the **Hotel** is required (as long as in 3-dot filter this option is enabled).

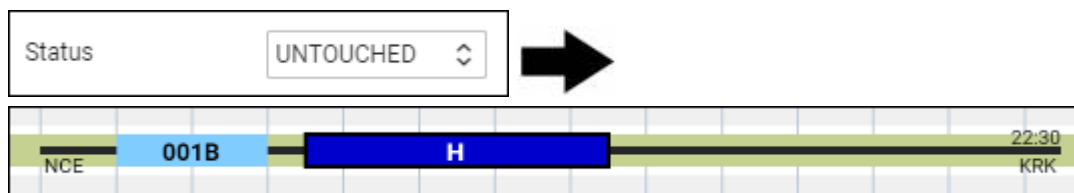

We have changed the hotel booking flow, so that it shows different colour indication depending on the hotel booking status.

If the hotel is needed, Leon will show 'H' in red.

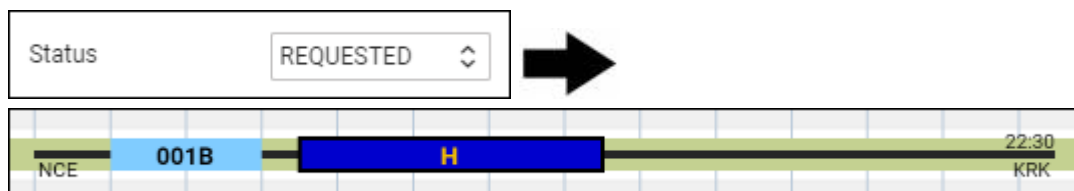

Right-click on the hotel belt and fill in the window with hotel details.

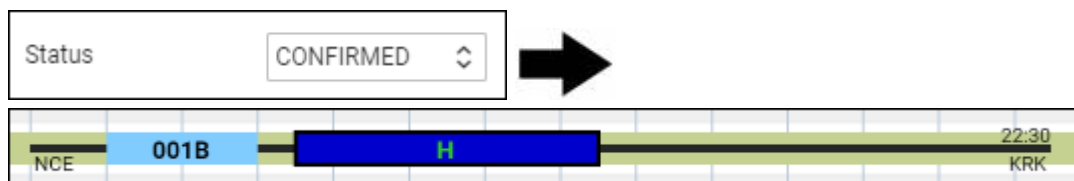

If hotel is selected along with the check-in & check-out times) but the status is set to 'Untouched' - the 'H' will show in white.

If the status is set to 'Requested' - the 'H' will show in orange.

If the status is set to 'Confirmed' - the 'H' will show in green.
