

Crew age validation

Crew age validation options

This option is available in the General settings. It might be required from the Cockpit Crew to not to fly together if they both are over certain age (60 or 65 years old).

For this, we now have introduced 3 options for Crew age validation:

- **Disable** - no age validation
- **Enable > 60 yrs** - a warning will be issued when assigned CPT & FO both are over 60 years old.
- **Enable > 65 yrs** - a warning will be issued when assigned CPT & FO both are over 65 years old.

The warning is issued upon saving the relevant crew on the flight. The warning reads as follow:

'Assigned CPT (FO) is over 60 (65) years old'
