Files upload history

You can now access the **history** of uploaded files in a section MX > Fleet Documents by clicking on the History link.

A pop-up window will open with the historical details of uploaded files containing the following information:

- **Person that made the changes**
- **Time and date when the changes were made (in UTC)**
- **Status of changes made to the file:**
  - `1.png` - new file uploaded
  - `1.png` - no changes made to the file
  - `1.png` - file deleted

Clicking on the file name within the status (e.g. `1.png`) will open this file. This includes **deleted files** as they're stored on Leon servers.

If you enabled the opening of attachments in a separate tab of your browser, please make sure that you enabled pop-up windows.

IMPORTANT!!! The history of uploaded files applies as off 'NOW'. It doesn't apply to the files uploaded in the past.
