

# Including aircraft in the Eurocontrol tracking

'Eurocontrol tracking' settings

**Eurocontrol tracking** is the new setting that allows including/excluding the aircraft in the Eurocontrol integration.

This setting is located in the Admin Panel > Fleet > 'OPS' tab in the edited aircraft details.

In the **FLIGHT WATCH / MVT** in the 'OPS' tab the following options are available:

- **No Tracking** - aircraft excluded for the Eurocontrol integration
- **Tracking** - aircraft included in the Eurocontrol integration. Full Flight Watch received
- **Tracking (CTOT only)** - aircraft included in the Eurocontrol integration. Only CTOT received from the Eurocontrol

If the integration with Eurocontrol is active, the Eurocontrol tracking is set to the 'Tracking' option by default.
