

Overflight Permits

It is now possible to request organising an 'Overflight permits' via one of the Flight Support Companies that are using Leon.

A screenshot of a web form titled "Request overflight permit from flight support". It has a "REPLY TO:" field with "leo@leon.software" and a "SEND" button. The "SUBJECT:" field contains "Overflight permit request 07 OCT 07 PM 0000". The "REQUEST:" section has two text areas: the first contains flight details and a note to "Please insert the details only once", and the second is for "Just Request, flight OPS". At the bottom are "CANCEL" and "SEND" buttons.

Overflight permit request window

To do that you need to:

1. Open an OPS checklist and click on the 'Request via flight support' link available underneath 'OVERFLIGHT PERMIT(S)' item
2. Choose the relevant 'Flight Support' from the dropdown list
3. In the pop-up window insert 'Reply to' email address. You can also amend the message in the text boxes. You have to insert the details only once, next orders will remember the input
4. Press 'SEND'. The 'Flight Support' will contact you back to 'Reply to' email address

This option is only available to the Operators that already are a Flight Support Client.
