

Fuel Prices settings

'FUEL' tab

In this section, it is possible to set up the default fuel settings per Operator.

The 'Fuel' section is divided into two subsections:

- **Fuel Settings**
- **Exclude Fuel Suppliers Imports**

Both subsections are explained below.

Fuel Settings

Settings in this subsection have been migrated from the 'GENERAL' tab. The functionality of the settings has not changed.

In this subsection, basic settings for fuel and fuel prices can be set up:

'Fuel Settings' subsection

- **Default fuel unit** - option to select kg or lbs. This will be used as a default unit, unless an aircraft has it defined differently in its profile (in [Fleet](#) section). In this case, Leon takes the aircraft fuel & weight units as default (displayed in the Journey Log)
- **Default currency for fuel prices** - default currency used in the [Fuel Prices](#) section as well as the [Fuel](#) tab in the OPS section
- **Default quantity unit for fuel prices** - default unit for fuel prices used in the [Fuel Prices](#) section as well as the [Fuel](#) tab in the OPS section
- **Default price type for fuel prices** - default price type used in the [Fuel](#) tab in the OPS section

Exclude Fuel Suppliers Imports

AirBP Alternate

AirBP Sterling

AEG FUELS Corporate

AirBP EUR/HL

Britannium Jet

Add fuel supplier import to exclude

'Exclude Fuel Suppliers Imports' subsection

In this subsection, it is possible to exclude the Fuel Suppliers from displaying in the [Fuel Prices](#) section.

This will allow displaying the Fuel Suppliers that are actually used in the [Fuel Prices](#) section.

Excluding the Fuel Suppliers is very simple. Click on the **Add fuel supplier import to exclude** button and select the Fuel Supplier in the dropdown. Click on the 'Update' button to save changes.

Once the list of excluded Fuel Suppliers is saved, the selected ones will not appear in the [Fuel Prices](#) section.

As per the below example, the 'Britannium Jet' supplier was excluded. Upon saving, it was removed from the list of available suppliers in the [Fuel Prices](#) section:

Upload fuel prices

Save

You must click Save to store fuel prices after the upload
