

Fuel prices updates

We have updated the way the fuel prices are kept and uploaded to the flights. Especially, the way the prices update and when they update.

This is as follows:

- if the flight has **not started** yet (before NOW, no FW and no JL inserted), the price will update with the new prices (if uploaded or added as custom prices)
- if the flight **started** (after NOW, or FW or JL inserted), Leon will keep the prices saved on the flight. The prices will not update with newly added ones (including custom prices)
- prices marked as 'Show on Trip Sheet'
