

COUNTRY TAX RATES FILE

When uploading fuel prices files to Leon, not all of them contain of a 'Total' price (including taxes). To make possible viewing 'Total' fuel prices in both: Fuel Prices & OPS > tab FUEL section, we have made possible uploading a file with **Country tax rates**, which will update 'Total' fuel price.

A file itself needs to be created as per a format below - only 2 columns are needed: **Country** and **Total Taxes**. A column 'Country' can have either country name (Argentina), country code (ARG) or iso code (AR). 'Total Taxes' values will multiply 'Base' price and will show as 'Total' price.

What's important is that the sheet's name must be 'Fuel Taxes', otherwise it will not work.

Uploaded fuel taxes will show on the main 'Fuel Prices' page in a column **Country tax rate** (see screenshot on the right).

If the fuel file uploaded to Leon already contained of 'Total' fuel prices, Leon will not update them.

In a panel OPS, tab FUEL, if you switch between 'BASE' & 'TOTAL', Leon will show prices accordingly, as per an example below: tax rate for Germany has been defined to '3' and Leon multiplied 'Base' price by '3'.
