

Handling Requests emails 'From' per a base

Introduction

New functionality for operators with multiple **bases** has been introduced - defining different emails 'From' for different bases on Handling Requests sheet.

In a section **General Settings** it is possible to define **bases**, then assigned aircraft & crew to a particular base (in aircraft or crew profiles).

Defined bases show as a drop-down list when hovering the mouse over an operator's code (in the top-right corner of the screen).

Email 'From' on Handling Requests sheet

It is now possible to automatically show different email '**From**' on the **Handling Requests** sheet, based on the email address inserted for a particular base.

In a section 'Settings' > 'Handling Requests' add an email address 'From' for each base, which should show on the HR sheet in a format:

“Name” <email>

Handling Request Emails From Per Operator Base

Email "From" ("Name" <email@address.com>)

MEL	"MEL" <melops@man.aero>
LTN	"LTN" <ltrops@man.aero>
VKO	"VKO" <vkops@man.aero>
JFK	"JFK" <jfkops@man.aero>

When sending a 'Handling Requests' email to a handler, Leon will show an email address 'From' based on the **aircraft base** assigned in its profile and the above settings:
