# Calendar view in SCHEDULE

We have also made some changes to Calendar view in Leon.

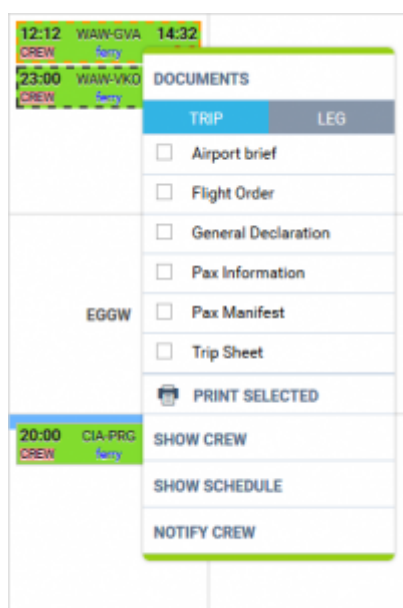

## Change of colours

Similar philosophy to Planned Flights view applies to Calendar view in Schedule section of Leon.

The colour coding is as follows:

-  - **Flight is confirmed**
-  - **Flight is not confirmed (option)**
-  - **Flight is completed (Journey Log has been entered)**
-  - **Canceled flight**
-  - **Training flight, and Flight for owner**
-  - **Any type of aircraft reservation**
-  - **Maintenance**
-  - **Maintenance option**
-  - **AOG maintenance**

## Possibility to select numerous legs of the same trip

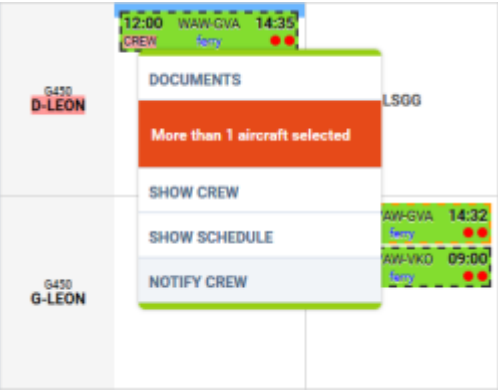

Printing documents for selected legs

It is possible now to mark number of legs of the same trip in Calendar view. It will allow you to print flight documents, and use additional options such as Show crew and Schedule as well as Notify Crew, for these particular selected legs.

In order to select multiple legs you have to hold the Ctrl button and click on the flights of your choice. As you can see in the screenshot all the selected legs will display with the dotted line.

If you try to print documents for the flights assigned to 2 different aircraft, Leon will display error message:

## Other minor changes

- Apart from scrolling Calendar view by using the side and bottom scroll bars, now you can also **“drag & drop”** the screen.
- We have also changed the number of lines in the squares from 3 to 2:
