

Section Planned Flights > Edit Trip has been re-arranged. Comparing to the previous one it looks more clearly in both tabs: **Trip Info** and **Quotation**.

Invalid Link

'Planned Flights' > tab 'Trip Info'

## Trip Info

The screen is divided in 2 columns:

- **Trip summary**

Contains 2 tabs:

**Legs** - here you can see added flights/options (schedule, aircraft, date, pax number and handling). If you hover the mouse over the 'Handling' dot a pop-up window will show up with handling agent/FBO details. A favourite handler is marked with a yellow star.

When you add a new trip in Planned Flights section there is no option to add crew, so Leon does not show **FDP** warning as long as the crew is added to the trip either from [Edit Flight](#) or [Crew Input Table](#) section.

When no crew is added you can still check **FDP limit** for just added trip by clicking **Click to refresh** icon. Leon will display details as on the screenshot below.

Once the crew is assigned to the trip you can 'click to refresh' icon to get the information **FDP: Correct** or **Flight Duty Period is too long**.
