Handling Request status changes checklist

### **It is possible to choose the elements of the flight that affect Handling Request the status.**

In order to do it you have to go to Admin > Operator settings > Handling Requests tab where you will find HR status changes checklist. Checklist consist of list of items as shown in the screenshot, which when ticked will affect the status and change it to  and vice-versa (unticked - changes made to a flight will not change the status). "Time change treshold" allows to set a buffer where when the schedule is changed by fewer minutes than indicated in this option, the HR status will not change.

All the elements of the checklist are ticked by default. **Schedule** checkbox is ticked and cannot be modified.

**This checklist applies to New Handling Request status changes only.**
