ACMI	<input type="checkbox"/>	(max: 1000) add new files...

Aircraft Speeds section

We have added a possibility to define aircraft speed depending on the stage of the flight.

If you go to Admin > Fleet, and edit an aircraft, just below Performance section there is Aircraft Speeds section. Insert the 'Speed' of aircraft in knots at each stage of the flight defined in hours (column 'From') i.e. 00:00 240, 01:00 460 etc.

This data along with GCD is used to calculate STA when creating a flight, i.e.:

Type	Code	Model	Flight No.	Date	Report	STS	ABEP	ADN	ESA	Block	WTT	ELA	COM	CPY	PG	SP	PA
<input checked="" type="checkbox"/>	D-LEON	DLB	13-01-015	AUTD	10:00	8000	SPIN										
<div> <div>10:48 (calculated from GCD)</div> <div>10:15 (calculated from GCD, average winds included)</div> <div>No enough historical data to estimate time</div> </div>
