

Right now if you define that either an online training or a practical training is required at a particular airport (section Airprot Directory > tab Brief/Training), Leon will add automatically an input in crew 'Personal endorsements'.

To avoid this action to be done for **FO** (if it's not needed), go to the section Settings > Flight editing and unmark a checkbox **Create trainings for FO** (right above JL items section).

Once it's done Leon will create required trainings for CPT only.
